# CAPABILITIES

## IT MODERNIZATION, LEGACY SYSTEMS DECOMMISSIONING, AND TRANSITION

Legacy systems are expensive to maintain, complex to modify and they introduce compliance risks. They make it hard to stay ahead of changing business needs with a long time to develop and release new functionality and result in diminishing Return on Investment (ROI). The key challenge for IT executives is offering the best services at the lowest cost with quick turnaround times in a dynamic environment. To stay competitive, this will invariably mean selective decommission of legacy systems and integration of infrastructure. At the same time, it is essential to develop new capabilities that run in parallel. Our proven model focuses on six fundamental principles to deal with this transition. 1) Proactive Risk Management 2) Customer Centric Processes 3) Optimized Distribution 4) Simplified Business and Operating Model 5) Gaining Information Advantage and 6) Enabling Innovation.

## CYBERSECURITY AND INFORMATION ASSURANCE

Our holistic approach to Cybersecurity addresses challenges in People, Process and Technology. We help CISOs and CIOs assess security baselines to strengthen Posture/Maturity; ensure system/data availability, integrity and confidentiality. We provide end-to-end Cybersecurity services to build capacity, mitigate vulnerabilities, ensure compliance, respond to incidents, enable continuity and resilience. Services include CISO /ISSO Support, Audits, Disaster Recovery, SA&A, ATO, POAM, RMF and CDM

## STRATEGY, GOVERNANCE, PROGRAM MANAGEMENT, AND ACQUISITION

We collaborate with client executives to develop IT strategic plans, goals, Roadmaps and execute them with measurable targets by employing industry best practices. Services include CIO Advisory, Strategic Planning, Gap Analysis, Governance, IT Portfolio/Program/Project Management, CPIC, Stakeholder Management, Communications and Organizational Change Management, PMO, Business Analysis, and Acquisition Support.

## INNOVATION AND ENTERPRISE AGILE TRANSFORMATION

Find out how our Agile Coaches and Scrum Masters can help you transform people, processes and technology of your organizations to reap the benefits of Agile Principles using our proprietary "T-Framework". We work with our clients to assess maturity levels, perform gap analysis and build Agile Teams. Our team provides dynamic, innovative strategies that comply with policies and procedures for Government Agencies.
